

10/18/2013, 10:15 am. Call from Michael Overbay, EPA Region 6 Ground Water Center Coordinator, to Mr. Peter Pope, Assistant Director for Site Remediation, Railroad Commission of Texas.

Re: Steven Lipsky, south Parker County, TX.

Mr. Pope did not answer.

10/18/13, 3:15 pm. I called Peter again and he was there. I asked if they had received any of the Duke data referenced in Mr. Lipsky's October 7th letter to Lisa Feldt and he said they had received some data from the homeowners, but he thought it was the same as what I had provided him. He did not have all ten of the homes data Lipsky indicated had been sampled, and he had no data about concentrations in air, other than seeing video about it similar to what was in the news, but definitely no formal reports. However, he was going to check with the district office personnel. I told him I would call back next week.
